PROFILE

Motivated Software Engineering student and Flutter app developer with hands-on experience in building modern mobile applications focused on clean UI/UX, structured architecture, and performance optimization. Skilled in Flutter, Dart, C++, C, Python, Data Structures & Algorithms (DSA), Object-Oriented Programming, and database fundamentals. Passionate about technology, human psychology, behavioral science, and lifelong learning, with a strong reading habit focused on self-development, communication, and understanding human behavior. A curious and disciplined learner with strong problem-solving abilities and a continuous drive for growth, innovation, and building impactful solutions.

EXPERIENCE

Chair person

Software Excellence Society 2024 - Present
i am chairperson of software excellence society and have lead my team many times through with many conferences and has served as hosting leader many times

EDUCATION

matric

Peshawar Model School Boys IV 2020 - 2022
Grade: A+

Intermediate

Islamia College Peshawar 2022 - 2024
Grade: A

BS Software Engineering

UET Peshawar 2024 - Present
Grade: 3.65

PROJECTS

Apex Discipline app

Flutter, Dart, github
https://github.com/sephiroth-007/apex_decipline
Apex Discipline – Habit Tracking & Self-Improvement Mobile App
Developed a Flutter-based habit tracking and discipline management application focused on productivity and self-improvement. Designed an interactive and modern UI with structured habit creation flows, progress tracking, and performance-focused architecture. Implemented clean app structure, reusable components, and user-centered design principles to create a smooth and engaging experience.

Cloud Guardian Ai

Python, fast api, react, flutter, github
<https://github.com/HamidKhan1001/CloudGuardian-Ai>
AI-Powered Cloud Operations Platform – Cost forecasting, incident analysis, and intelligent recommendations in one unified console.

Attend iq

python, fastapi, react, flutter, postgreSql, github, vercile, railway
<https://github.com/sephiroth-007/AttendIQ>
This cloud-based Attendance Management System is a multi-tenant SaaS solution designed for educational institutions. It enables secure, automated attendance marking through time-limited QR codes, ensuring validity and preventing misuse. Teachers manage sessions via a web dashboard, while students mark attendance in real time using a mobile app. A centralized backend with APIs handles authentication, validation, and reporting, while containerization with Docker ensures scalable, consistent deployment across environments.
